

FR900

Multifunctional Resin Coating

FR900 is a multifunctional spray coating technique.
It can be applied on various materials and complex shapes.
It also does not contain any leads for better consideration of the environment.

1. Environmental-Friendly

It is completely lead-free in both resin and metal layers.

2. Best Under Fluid Conditions

Applicable for materials including:
metals, rubbers, plastics, etc.

3. Excellent Function

High film strength, excellent adhesiveness,
low friction under oilless conditions,
anti rusting effect, an effect of
preventing a creaking sound, etc.

*We are available to have through meetings
with you to offer services and advice on what
is the best for your purposes at the most
affordable prices.*

STRUCTURE

this is a resin coating with
a mixture of MoS₂ and PTFE,
which makes the material double layered.
